
BildeLOTTO

Forarbeid

Skriv ut dei seks arka med bilde av ulike energiformer.
Bruk 200-grams ark. Desse arka er kraftige og skjuler bilda på korta.
Klipp ut brikkene. Arka kan eventuelt laminerast før klipping.

Regler

Legg alle dei ferdig utklipte korta på bordet med bildesida ned. Ein elev startar med å trekkje to kort. Dersom desse korta har like teikningar, blir paret behalde. Eleven har klart å samle eit «stikk». Eleven kan så trekkje to kort ein gong til. Dersom bilda no ikkje er like, blir korta snudde igjen, og neste spelar trekkjer.

Den spelaren som har flest «stikk»/par når bordet er tomt for kort, har vunne.

Finn par – bilde til tekst

Forarbeid

Skriv ut dei to arka med bilde og tekstkort av ulike energiformer.
Bruk 200-grams ark. Desse arka er kraftige og skjuler bilda på korta.
Klipp ut brikkene. Arka kan eventuelt laminerast før klipping.

Regler

Legg alle dei ferdig utklipte korta på bordet med bilde- og tekstsida ned. Ein elev startar med å trekkje to kort. Dersom desse korta har likt innhald, blir paret behalde. Eleven har klart å samle eit «stikk». Eleven kan så trekkje to kort ein gong til. Dersom bilda no ikkje er like, blir korta snudde igjen, og neste spelar trekkjer. Den spelaren som har flest «stikk»/par når bordet er tomt for kort, har vunne.

Bildelotto med brett

Forarbeid

Skriv ut dei fem arka med bilde av ulike energiformer på i to sett. Bruk 200 grams ark.
Desse arka er kraftige og vil skjule bilda på korta. Klipp ut brikkene. eventuelt laminer før klipping.
Skriv ut dei fire bretta og laminer dei.

Reglar

Legg alle dei ferdig utklipte korta med bildesida ned på bordet. Ein elev startar med å trekkje eit kort. Dersom dette kortet kan plasserast på brettet til spelaren, blir det lagt på rett plass. Neste spelar trekkjer så eitt kort og sjekkar om kortet passar på brettet sitt. Dersom det ikkje er noko ledig felt, blir kortet lagt tilbake på bordet med bildesida ned. Neste spelar trekkjer kortet sitt. Den spelaren som får dekt alle dei ni felta sine først, vinn spelet.
